Aerospace Engineer turned Creative Technologist. I make machines that tell human stories.

EDUCATION

Masters in Design & Technology
w/ Department Honors

Parsons School of Design 2023

Bachelors in Aerospace Engineering
w/ Minor in Industrial Design

IIT Bombay

SELECT CREATIVE WORK

Ephemera [↗](#)
Time-based kinetic sculpture

NYCxDDesign 2025

- Built a Physical-Digital installation exploring impermanence through material decay
- Created a multi-state narrative system using mist & condensation as storytelling triggers
- Handled all creative phases: concept, prototyping, fabrication, and final installation

...And Words will Echo in My Soul [↗](#)
Interactive Installation for a 30k+ footfall festival

LUMA Festival 2024

- Designed an installation where participants watch their inner critic projected onto their own body in real-time
- Built a visual system using ML body segmentation and computer vision and complex optimization for a real-time response

Palimpsest [↗](#)
Multiple 3-hour long Interactive Performances

Grace Exhibition Space 2023

- Designed and fabricated a 6×6×6 ft kinetic structure serving as both stage and storytelling device for interactive performances, with 21 participants
- Translated participant conversations into physical and visual compositions in real-time
- Programmed interplay of light, movement, and materiality to visualize human emotion

Notes to Self [↗](#)
Interactive AI-driven self-reflection experience

Parsons School of Design 2021

- Designed a four-act narrative structure where participants converse with digital versions of themselves using ML models for motion capture, voice, lip syncing and dialogue
- Crafted intimate, introspective moments through deliberate pacing and visual restraint
- Integrated four separate ML systems into a single coherent real-time experience

PROFESSIONAL EXPERIENCE

VP, Experience Design Lead
Leading the design of an AI platform

Citibank 2024 - current

- Leading design for an enterprise AI platform, transforming fragmented data systems into a cohesive, narrative-driven visual interface for senior executives.
- Partnering with cross-functional stakeholders to align creative vision with business objectives. Established design principles and visual standards.

Product Manager
Led 0 to 1 launch of a B2B SaaS platform

Elements Connect 2023 - 2024

- Owned product vision and roadmap for the platform, from concept to launch
- Drove adoption through direct C-suite engagement, signing 19 new enterprise clients
- Led user research & enhanced UX, achieving a 90% reduction in transaction time

Creative Director

Freelance 2023

- Developed comprehensive brand identity & design system for a social media startup
- Produced a print magazine overseeing editorial layout, typography, and visual continuity

Graduate Researcher

Parsons School of Design 2021 - 2023

- Researched AI in visual and interactive design using Midjourney, ml5.js, and GPT-2 APIs
- Developed an interactive quantum visualization in partnership with IBM, bridging complex data with accessible visual storytelling

Data Scientist
WCAG Accessibility for websites

Citibank 2016-2021

- Introduced automation that reduced audit review time from 40 hours to under 5 minutes

MENTORSHIP & WORKSHOPS

Workshop, Physical Computing Workshop	<i>The New School</i>	2024
Mentor, Hardware Track, MIT Reality Hack	<i>MIT Media Lab</i>	2023
Mentor, Quantum Design Jam	<i>IBM</i>	2022

SKILLS

Concept Development, AI Prototyping, Prompt Engineering, Cross-Function Team Management	<i>Leadership & Strategy</i>
Creative Coding, Physical Computation, AI/ML, Computer Vision, Sensors and Kinetic Systems, AR/VR	<i>Front-end & Creative Tech</i>
Interaction Design, Rapid Prototyping, Fabrication	<i>Prototyping & Interaction</i>
